

7

bottom surface of the insulative housing, wherein part of the linking member is embedded in the insulative housing.

19. A cable connector assembly, comprising:

an insulative housing and a plurality of contacts received in the insulative housing;

a linking member on a top surface and a bottom surface of the insulative housing, wherein part of the linking member is embedded in the insulative housing;

a cable electrically connected with the contacts;

a light guiding member;

8

a cover enclosing the insulative housing and the cable;

an LED covered by the light guiding member; and

at least one film located to seal a gap between the insulative housing and the cover.

20. The cable connector assembly as claimed in claim **19**, further comprising a flexible printed circuit board, the flexible printed circuit board comprising an upper board and a lower board.
